## Liquid Crystal Temperature Monitoring

ATI's liquid crystal forehead thermometers provide accurate core temperatures quickly and easily.

When body temperatures begin to rise, you need to take quick, decisive action. ATI's expertise in liquid crystal technology answers the challenge with quality, FDA-registered forehead thermometers.

You can build cost-effective pandemic or H1N1 kits using our Class 2 medical devices. During any illness outbreak, ATI forehead thermometers provide a critical first line of defense. Early fever detection not only helps prevent the spread of illnesses, but it also ensures faster treatment.

ATI's forehead thermometers are easily customizable:

- Size and shape
- Overall design, including personalization
- Adhesive-backed paper or mylar forms
- Single or multi-use

## PREPARE FOR THE UNEXPECTED

ATI's forehead thermometers offer a fast, accurate way to monitor core body temperatures and take prompt preventive action. You can obtain an accurate temperature in about 15 seconds. It's simply a matter of watching the liquid crystal display until the colors stop changing. And since you can take temperatures non-invasively, the forehead thermometers are ideal for use with children and surgery center patients.
